Hello to All,

Welcome to our 2009 Rose Planting Season. Unfortunately, due to the uncertain economic climate we have reduced our production this year by deleting many of the older and not so popular varieties. I have tried to keep as many of the older stronger growing varieties as possible with an emphasis on culling the poorer less productive varieties.

If there was a variety that you liked and can no longer find it on the website let me know as we may still have the budwood here and we could graft some for you for next year..

Also, we have introduced some new exciting colours for 2009 and they can be found on pages 2 & 3 of this catalogue :- Such as **Good Samaritan, Ebb Tide, Love In, My Hero.**

Unfortunately, the \$1.50 levy on credit card transactions still applies to cover bank fees. Another alternative for those who have Internet banking would be to direct deposit straight into my bank account. Just phone my office on (07) 41597313 and I will give you my account details.

I wish you all every success in the year ahead.

Happy Gardening

Allan Trebbin

Manager - Trewallyn Nursery

TERMS OF BUSINESS

All plants grown by us are carefully nurtured, lifted, inspected and packed to ensure that they travel safely and reach customers in perfect condition for successful planting. We study all requirements with care and despatch high quality plants to fulfil them.

LIMITED WARRANTY

You are the reason for the success of our business and we want to do our best to retain your patronage for life. However, as Australia is a vast country with many different climates, soil and water types, **we offer no warranty expressed or implied, as to growth, productivity, description or quality and will not be responsible for the crop, as these factors are governed by forces beyond our control.** If the plants are found to have been wrongly labelled, we correct the mistake with new plants, when reasonable evidence has been forwarded to our office.

If you feel or suspect there could be a problem with our plants, you should notify our office within 4 weeks of receiving our plants, so we can help you solve any problems that could be hampering the establishment of your new plants. **Any claims forwarded after the four week period has elapsed may not be recognised.** All sales are made subject to these terms and if the purchaser does not accept the goods sold on these terms, they are at once to be returned and your money will be refunded.

Terms of Business: Strictly cash with order, unless otherwise arranged.

Prices: We reserve the right to alter priced without notice.

Substitutes: Please add to the order a few names that could be used as substitutes; or please state if substitutes are not required.

Ordering Instructions: To save possible errors and misunderstanding, it is advisable to use the special order form.

Despatch of orders: Clients are requested to give full and careful directions with their orders as to the method they wish goods to be forwarded, i.e. either by train, parcel post or road. When no instructions are received, we send according to our judgement. Freight is extra on all goods and where possible, freight is charged to receivers end.

Those who wish to call and collect their plants are asked to give two days notice of their intention to do so; we would then have the plants ready, provided that the order is being executed in its fair turn.

PLEASE NOTE:

Owing to increased cost, we regret that we will not be in a position to acknowledge receipt of orders unless a self addressed envelope is enclosed. Your order will be packed and despatched as soon as practicable after the receipt of your order. We can advise how and when your order has been dispatched, if requested.

ROSE CULTURAL NOTES

Perhaps the greatest secret in rose growing is the early preparation of the garden bed. There is more to planting a rose than digging a hole, spreading out the roots and then replacing the soil. Before you even lift a spade, you should have carefully considered the soil.

The most expensive roses you can buy will grow only as well as the soil allows. Very few soils are naturally ideal but almost all can be transformed into a satisfactory home for roses. Roses prefer a slightly acid soil, with a soil ph of, or between, 6 and 7 with 6.5 preferred. Acid soils below 6 need lime or dolomite. Alkaline soils above 7 ph need sulphur. For best results, it is good idea to have soil tested and prepared at least 6 weeks before planting. (If more information is needed referring soil testing, please contact us by phone, post or e-mail.)

Rose gardens must be kept well away from trees and shrubs, planting should be carried out from May to September. When planting your roses, don't make the mistake of digging a hole which is too deep and narrow. The planting hole must be large enough to allow the roots to be spread out, without cramping.

Soil at the bottom of the hole is drawn into a small mound, place plant in hole spreading roots evenly over mound, work soil around the roots and then firming soil with feet, add more soil and make sure that the bud union is approx. 2 cm. above ground level. Stamp soil down firmly.

To the impression made by stamping, add 10 litres of water and leave until water soaks away, fill in hole with loose soil. Check before further watering (scratch loose soil from surface to where stamping impression was made, check for moisture, if sufficient moisture is present then there is no need of watering). Repeat this procedure every couple of days as the soil may not need any further watering until plants have shot and are in growth, when the plants will need frequent watering. *PLEASE* make sure that you never put artificial fertilizers in the soil surrounding the newly planted rose bush. Such applications may burn the tender roots. Our comprehensive planting guide is sent out with each order.

We often receive queries regarding the blooms that appear on newly established roses. Our advice is to let these blooms mature and then cut the flower with a short stem, cut back to the first strong eye which points outward.

Pruning is another problem, which seems to worry many of our growers. The purpose of pruning is to get rid of any old and spindly wood every year and encourage the regular development of the strong and healthy stems. Note that pruning will not give you more flowers next year (this is the job of feeding); but it will give you a well shaped bush or tree which will continue to flower freely for many years to come. We recommend that the grower first cut out completely any dead wood and all parts of stems which are obviously diseased or damaged. Cut out completely any very thin stems and remove any branch which rubs against another, aim to produce an open-centred bush. Stems are cut back to about half of their length. Weaker than average stems should be reduced by more than this amount. Heavy pruning should be carried out only in winter (late July or early August); when the plant is dormant.

Spraying is an essential chore for the successful rose grower. To cover this aspect, we have included a spray programme and several environmental spray recipes at the back of this catalogue.

BARE ROOT ROSE SEASON : MAY – OCTOBER

PBR. Plant Breeders Rights Act 1994.
 Unauthorised sale of plants or plant material is illegal. Serious penalties apply.

**New Release Varieties
FOR THE 2009 SEASON
Price Code B**

- DAYBREAKER** (PBR) price code B. Grandiflora. Yellow, apricot and pink blends. Blooms non-stop through out the season! Petite clusters of perfectly formed spiral buds swirl open in warm yellow tones blending to apricot and pink. A lush, bushy plant with superb disease resistance.
- EBB TIDE** (PBR) price code B. Floribunda. Deep smoky purple. Soooo mysterious in its colour and soooo powerfully perfumed it's certain to attract attention. Dusky deep purple, some say black, buds swirl open to very double old-fashioned flowers of velvet plum washed with a haze of sultry smoke. The intense clove fragrance can nearly bowl you over.
- GOOD SAMARITAN** (PBR) price code B. Hybrid Tea. Deep fuchsia pink. An undeniably magnificent rose. Exceptionally high centred, fully petalled blooms of satiny deep fuchsia pink are breathtaking in a vase. Tall and well branched this is a rose to remember. The best new Rose to come out.
- LOVE IN** (PBR) price code B. Floribunda. Swirling lemon, pink ageing to rose. Swirling, entrancing colours will blow your mind and just make you want to have one, or a hundred, because you are lost in the maelstrom of an organic colour palette. Arranged like the best 60's abstract painting you cannot deny complete absorption and need.
- MY HERO** (PBR) price code B. Hybrid Tea. Classic, shining rose pink. Big and bold but with a heart the size of all out doors. Blooms are oversize, supersize if you like. Clean pink tones that don't fade and flowers that clear from the bush without the need for deadheading. The XXXL size flowers muscle out from deep pink buds to do battle with the bad guys and rescue the disadvantaged. Luscious glossy foliage forms the hero's stage holding its world of flowers up high for everyone to see.

**New Release Varieties
FOR THE 2008 SEASON
Price Code B**

- CABANA:** (PBR) Price code B. Rose pink and light yellow stripes. This fragrant rose has dark green semi-gloss foliage and grows to 120 cm. in height.
- CANDLELIGHT:** (PBR) Price code B. Ideally named, Candlelight produces a glowing, fragrant, yellow bloom with all the nostalgia appeal of old fashioned roses. An excellent repeat bloomer, Candlelight has a bushy compact habit and grows to 1.2m.
- FULL SAIL:** (PBR) Price code B. Fragrant, Bright White flowers with glossy green foliage. Height to 150cm. Should make a good exhibition & cut flower Rose.
- HEAVEN SCENT:** (PBR) Price code B. Orchid Pink with an intense old damask perfume. Clean green foliage with good disease resistance. Height to 135cm.
- HONEY DIJON:** (PBR) Price code B. Warm Golden Brown Flowers with a good sweet fragrance. 2005 Bronze medal winner. Height to 120cm. Profuse Bloomer.
- PRIDE OF VENUS: Climber** (PBR) Price code B. This moderate climber will greatly appeal to lovers of nostalgia, whether planted on a fence or a pillar. Pride of Venus has a large, densely petalled blooms of pale lemon yellow, occasionally showing hints of green. The recurrent blooms exude a light fragrance, adding to it's old time charm.
- RHAPSODY IN BLUE** (PBR) Trusses of fragrant, rich purple-blue flowers in the floribunda style. Grows to 1.5m - 2m high and 150cm. wide. A welcome new colour for any rose collection. Also suitable as a small climber or pillar rose
- FIRE & ICE™** This hybrid tea rose is a colour sensation. Bright cherry red tips colour each crisp white petal creating a brilliant bi-colour effect. Recurrent bloomer, slightly fragrant with dark glossy foliage. Flowers last well when cut. Excellent disease resistance. A wonderful addition to any garden. Height 1.5m Width 900mm
- TEQUILA LA SEVILLANA™** Here is a floribunda that provides nearly a continuous display of attractive bright yellow-orange flowers blending into pink. The loose blooms contrast nicely with the dense dark green foliage. Height 1.5m Width 900 mm.

New Release Varieties
FOR THE 2007 SEASON
Price Code B

- AUGUSTA LUISE** (PBR) Large fragrant blooms, with nostalgic 'olde worlde' form, apricot centre with deep pink on the outer petals, borne singly and in clusters of 3 - 5 blooms. The soft colours are most beautiful late summer into autumn. A hardy vigorous plant. Height: 1.5 m to 1.8m
- McLEOD'S DAUGHTERS** (PBR) A colour sensation. This shapely floribunda rose freely produces an excellent display of rich, creamy apricot double blooms, often tinged with a coppery reverse. There is a pleasing sweet lemon fragrance. It is hardy and disease tolerant, and well clothed with light to mid green glossy foliage. Suitable for the garden or large tub and can be cut for indoor use. Height: 1.5m Width: 900mm
- BIONIC BEAUTY** (PBR) A beautiful hybrid tea, displaying a bounty of shapely, soft shell pink blooms that are both full and well formed. The spiced rose perfume is an added bonus. Sound and sturdy, this rose, with its glossy, deep green foliage, has fine form and good health, making it a wonderful gift for someone special. A great garden performer. It is also suitable for a large tub. Named in honour of the Bionic Ear Institute. Sounds beautiful! and so it is. Height: 1.5m Width: 900mm
- BOLD SEDUCTION**® Darker sport of the ever popular SEDUCTION. Exquisite petals of deep sunset pink and ivory cream combine to form sensuous semi-double blooms of porcelain perfection. Lovely in the garden or as a cut flower. Plentiful buds, airy fragrance and attractive foliage will create an elegant display in your garden or large pot. Height: 1.2m Width: 900mm

New Release Varieties
FOR THE 2006 SEASON
Price Code B

- ASHRAM**™- The fragrant blooms of this new release rose are a bright olde gold colour. The bush has got a good resistance to black spot. A free blooming variety, height to 1.2m
- OUTBACK ANGEL**™ - Ruffled blooms of amber to apricot with a distinctive copper veining through the petals. Mild rose perfume. Hardy, glossy mid-green foliage, can be used as a garden specimen or as a bedding rose. This lovely rose celebrates the fine efforts of the Royal Flying Doctor Service. Height -1.2 m. Width - 900mm.
- RED PIERRE**™- This new pillar rose produces masses of large, burgundy red, very double cupped blooms still with the old world charm and elegance. Mild rose scent, very good disease tolerance, continuous flowering. Coverage - 6 -8 sq. metres. Perfect for the verandah post, trellis, archway and tripod.
- ULYSEES**™- Ruffled creamy apricot blooms are produced on long cutting stems making this rose both popular in the home and garden alike. Highly perfumed, repeat flowering and good disease tolerance. Height - 1.5m. Width - 900mm.

New Release Varieties
FOR THE 2005 SEASON
Price Code B

- CLOSE TO YOU**™ (Code: Saffran) A rose of immense quality and elegance. Each creamy lemon, double bloom sits atop a long stem, ideal for cutting. Perfectly perfumed, its fragrance will radiate throughout the garden. A robust performer with exceptional health and vigour. A real gem. H : (approx.)1.8m. W : (approx.) 1m.
- GIFT OF GRACE**™ (Code: Zincaro) Majestic classic double blooms in a rich ruby pink, with a subtle silvery reverse. Makes a lovely display in either in the garden or in the vase. Strong sweet fragrance layered with spice. Repeat flowerier. Abundant, healthy foliage. Height approx. 1.5 m. Width (approx.) 90 cm.. Chosen by the Uniting Church as their flower to represent the wide range of services they provide in the community. \$0.50 donation from each sale is returned to further assist this work Height (approx.) 1.5 m. Width (approx.) 90 cm.
- LOUISA STONE** - Fragrant (9 cm) blooms of 40 petals that are pearl blush with a peachy centre. The moderately spreading bush presents the blooms in clusters

from the ground up on foliage that is resistant to black spot. Height to 70 cm. Width to 90cm.

LUCINA™ (Code: Jeep) The soft ash-lilac, double blooms are reminiscent of shades of dusky twilight. Each medium sized flower is produced in small clusters and carries a heady sweet rose scent - outstanding and long lasting. Healthy and happy, this rose is sure to please. H (approx.) 1.2m W (approx.): 90 cm

New Release Varieties FOR THE 2004 SEASON Price Code B

BURGUNDY ICEBERG (PBR) A burgundy sport of Iceberg. This plant is exactly like its parent in every way but colour. It has the same great landscape value, free flowering habit, foliage and the same great flowers, with just a hint of perfume.

IAN THORPE (Olijbrau) PBR applied. Selected by and named after one of Australia's greatest swimming heroes. The terra-cotta coloring of this rose makes it a true novelty for the garden. Light rose scent. The glossy dark bronze green foliage has a good disease tolerance. Bred for the garden, each plant will reward with an abundance of classic shaped blooms produced continuously over the flowering season. Part proceeds from each sale will benefit 'Ian Thorpe's Fountain of Youth Foundation'. Height to 1.5m.

IN APPRECIATION™ A very bright deep pink HT rose that stands out amongst other colours. The flower has some fragrance and a luminous appearance that will stand out in any rose bed. 'IN APPRECIATION' is an ideal way of saying 'Thank you' for any situation.

MAGGIE (Meichibon) PBR Applied Named after one of Australia's most recognised people - MAGGIE TABBERER. This exquisitely formed rose was selected by Maggie. The soft white to lemon blooms carry an abundance of petals creating an old world charm of romance and style. Each plant will produce a constant display of flowers while perfuming the garden and its surrounds throughout the flowering season. Part proceeds from each sale to the 'Melanoma Foundation'. Height to 1.5m

AUSTRALIAN TRUE BLUE COLLECTION PRICE CODE - C

'65 ROSES' (PBR) (TOM.fib) Interesting name of a lovely rose bred for Cystic Fibrosis Association. Buds of apricot opening to cream on long stems, fragrant, semi-single flowers. This Australian bred rose grows to over 1.5 m in height.

DEANE ROSS (PBR) (TOM.boss) The blooms of this rich mauve-pink rose is tightly ruffled and fluted in an old fashioned manner. True damask rose fragrance, neat bush habit of growth, continually flowers for eight months of the year. Height - 1 to 1.5m.

LOVE'S GIFT (PBR) (TOM.gift) Charity rose for the Down Syndrome Society. This spectacular red rose is very hardy with a high disease tolerance. It makes a good cut flower and grows to a height of 1.5m plus.

MAWSON (PBR) (TOM.son) A low growing (up to a metre) landscape rose that could be used as a border, low hedge or garden plant. The dainty, tough little white to cream blooms are freely produced in great masses over the bush. It has a pleasant fragrance and is almost thornless. Healthy dark leathery foliage. Could be described as a smaller version of 'Iceberg'.

- DEAREST** (F). Rosy salmon, AS 7.5-8.5cm. (1960). Double, well formed, fragrant cluster, Fol. dark, glossy, Vig., bushy, free bloom, medium growth NRS Gold Medal 1961.
- ESCAPEDE** Flowers magenta-rose, centre white, blooms in clusters, slightly fragrant, foliage light green, glossy.
- EUROPEANA** (F). Deep crimson, AS 7.5cm. (1963). Slightly fragrant large, heavy cluster, Fol. bronze green, Vig., very free bloom, Hague Gold Medal 1962.
- FRIESIA** (SunSprite) Bright unfading yellow. Healthy and compact Free blooming and good fragrance.

GARTENDIREKTOR O. LINNE (F). Dark carmine pink with darker edges, base is a yellowish white (1934). Clusters of about 30 borne on long stems. A vigorous bushy grower with profuse blooms.

GERANIUM RED (F) Geranium red, A.S. 7.5 cm. (1947) Double, bud globular, fragrant, single to small cluster, fol. dark, glossy, vig., tall, bushy, free bloom.

GINGER MEGGS (F). (Delbard) The colour of this variety is quite distinctive; we consider it to be the nearest to carrot-red we have seen. The bush is not only healthy, but extremely free branching, therefore free blooming. The flowers are attractive at all stages, including fully open (10cm). Could possibly be classified at H.T., but we favour Floribunda. Fragrant.

GOLD BUNNY (F). Soft gold blooms, fairly large and classic form, borne singly or in small clusters on compact healthy plant. Free flowering.

GOLDEN YEARS (F). A rich chrome yellow bordering on amber rose with numerous petaloids. Blooms are in trusses and up to 8 cm in diameter. Colour holds well even in mid summer.

HOT CHOCOLATE (F) Unusual colour of deep rich orange. Slight fragrance. Foliage, leathery with good growth.

ICEBERG (F). White, AS 5-7.5cm. (1958). Double, bud long, pointed, open, fragrant cluster, Fol. light green, glossy, Vig., upright bushy, free bloom NRS Gold Medal 1958.

IMP (F). White with red edge (AS 5-7.5cm.) (1971). Fully double, hardy and bushy.

JULISCHKA (F). (Tantau) Brilliant scarlet red. 5-7.5cm flowers of 25 petals produced freely in trusses with splendid foliage that retains the suggestion of red young leaves until flowering time. The brilliant colour of the flowers stands up to extreme of wet or heat. Awarded Gold Medal N.Z. Trial Ground.

LA SEVILLANA (F) A nice floribunda effect. Flowers very freely with glowing red blooms on a healthy well proportioned bush. Try growing as a living fence.

LILLI MARLENE (F). Crimson overcast spectrum-red, AS 5-7.5cm. (1959). Semi-double, bud ovoid, cupped, fragrant, Fol. leathery, Vig., free bloom.

LOVE POTION PVR (JACsedi) F 1995 **PRICE CODE B** Rich, deep lavender flowers on a small, robust bush. Excellent perfume.

LOVELY LOUISE. (Flori) Apricot salmon. (1990). Good shaped buds formed on medium sprays. Growth is medium, healthy and vigorous. Free flowering.

MAGIC FIRE (Meicurbo) Type - Flori. **PRICE CODE C** The clusters of semi-double blooms are a unique rich coral to salmon pink, ageing into a soft apricot pink which makes the plant eye-catching without being gaudy. Ideal as a feature or for mass planting. The plant has mid-green foliage and grows to a height of approx. 1.2m, and width approx. 900mm. Slight fragrance, repeat bloom.

MARGARET MERRIL Satin pink to off white. P.18-20 (1977). Large 10cm. semi-double blooms, high scented, full, very fragrant free flowering.

MATTHIAS MEILLAND Medium blooms of bright signal red are borne freely on dense green growth. Disease resistant.

MODEL OF PERFECTION (F). (Dickson) Deep yellow with an orange tint outer petals deep cerise. Very double, firm, slow opening 5cm. flowers of superb exhibition form normally found in large flowered roses. Perfectly circular outline evenly arranged petals with superb reflex and a fine pointed centre. The flowers keep extremely well either on the bush or when cut.

MOONSPRITE Cream to pale gold at centre. Old style blooms of a medium size and shape.. Free flowering.

MOULIN ROUGE (F) 1952 Flowers medium red. Double.(P.20-25) 4-5 cm. Blooms in clusters. Slightly fragrant. Foliage glossy, upright, very bushy growth.

ORANGES AND LEMONS PVR (MACoranlem) F 1996 **PRICE CODE B** Sensational orange and yellow striped blend. Disease resistant.

PINK CHIFFON (F). Pale pink, AS 7.5-8.5cm. (1956). Double, bud ovoid, cupped, to flat fragrant Fol. glossy, Vig., bushy, free bloom, medium growth.

PLAYBOY (F). Scarlet and gold. P.10-15 (1976). Large 8.5cm. single blooms, slight fragrance, Fol. glossy, dark. Free growth and abundant bloom.

POLO CLUB (F). Bright yellow edged red (1986). Semi-double, a very striking combination, disease resistant foliage, growth compact.

RED PIXI (Kordes) Bright red. Medium growth, good flowering specimen.

SATCHMO (F). Rich orange red. (Raised by McGredy, 1970). Well formed, fully double blooms. Borne in large clusters. Fol. dark green. Bushy. Gold Medal at The Hague and Roelux.

SCENTIMENTAL PVR (WEKplapep) F 1998 **PRICE CODE B** Blooms of burgundy red swirled with creamy white and others creamy white splashed with burgundy red. As the name implies this rose has perfume.

SEDUCTION (Meibeausai)- **PRICE CODE C** Ivory, gently deepening to sunset at the edges. (1990). Medium size buds borne in clusters up to 10, which last well when cut. Bushy growth, light green foliage. Australian Patent No. 630935.

SEXY REXY Flowers are medium to light pink in large clusters. .Low bushy growth with light green foliage.

SHADY LADY (Meisecaso)- **PRICE CODE C** Rose pink, shading ivory to the centre. (1989). Medium sized flowers borne in clusters, fragrant, light glossy green, foliage, a good bedding variety for semi-shaded positions. Patent No. 618254..

SIMPLY MAGIC (F). (Meitobla) **PRICE CODE C** Stunning clear mid-pink blooms produced in large clusters almost continuously throughout the year. It is a low shrubby bush with glossy rich green foliage that is constantly covered with flowers and is ideal for smaller gardens and patio areas where high colour is needed. Spectacular in mass plantings. PVR App. No. 93/200.

SUNNY HONEY (F). Yellow, pink blend, rev. red. P.20-25 (1972). Large 10cm. double, ovate fragrant

SWEET SONATA (F). (Meioffic)- **PRICE CODE C** Blush pink deepening to rich apricot with a strong "fruity" fragrance. The bloom is of the classic form and are produced on good length stems. Lasts well when cut. The bush is of medium height and compact growth. PVR App. No. 93/201.

TOURNAMENT OF ROSES PVR (JAcient) (GR) **PRICE CODE B**
Luminous two toned, double blooms of soft pink suffused salmon. Disease resistant foliage.

TUTU MAUVE (F). (Delbard). Deep magenta in the bud. Maturing to mauve in the 10cm. open flower of 25-30 petals. Very freely produced in sturdy robust growth. A very attractive variety that could almost be classified as a Hybrid Tea. Gold Medal Madrid Cert Lyon and Geneva.

VALERIE SWANE (F.) White. (1986). A sweetly scented floribunda, which has large clusters of shapely blooms.

VIOLET CARSON (F). Salmon, rev yellow. A.S. 8.5-10cm. (1964). Double, bud ovoid, high centred, fragrant cluster, Fol. dark, glossy, compact bushy, tall, free bloom.

WHITE SPRAY (F). White. Growth extremely healthy and individual blooms large and perfectly formed. A recommended rose.

WOBURN ABBEY (F). Orange tinted salmon orange. AS 8.5cm P.25 (1964). Fol. dark, leathery. Moderate grower with plenty of blooms.

ZAMBRA (F) Nasturtium orange, reverse yellow. A.S. 6-7 cm. P.10-15 (1961) Bud ovoid, cluster, slightly fragrant. Vig., well branched, abundant bloom. Bagatelle Gold Medal 1961, Rome Gold Medal 1961.

POLYANTHA ROSES

PRICE CODE- A

Best time to PLANT- Bare rooted -JUNE to mid SEPTEMBER
Potted-----MARCH to DECEMBER

POLYANTHA ROSES are dwarf cluster-type roses which grow from 45-60cm. tall. The flowers are similar in shape to a pom pom, and they are noted as free bloomers. Growers will find that this type of rose is useful for massed bedding. They should not be grown in bed with other rose types. Polyantha roses may be planted 60-75cm. apart.

PRICE CODE- A Applies to all Polyantha roses in this section.

P- Polyantha

ACERVATE (P). Mauve pink, AS 3.5-5cm. Double, borne in large clusters, medium growth, fragrant

BABY ALBERIC (P). Creamy white, AS 5-6.5cm. (1932). Double, bud yellow, medium growth, Vig., recurrent bloom.

BORDER KING (P). Strawberry red, AS 3.5-5cm. (1952). Semi-double, large truss, Fol. dark, glossy, Vig., free bloom, medium growth.

CECILE BRUNNER (P). Pointed buds, flowers small, double open, fragrant bright pink over yellow cluster, foliage, soft green, dwarf. Free blooming.

CHINA DOLL (P). China pink, 3.5-5cm. (1946). Double, bud pointed, cupped, large trusses low growth, Fol. leathery, bushy, free bloom.

CRIMSON ROSETTE (P). Dark crimson, AS 3.5-5cm.(1948). Double, bud ovoid, open, rosette form cluster, Fol. leathery, dark, Vig., medium growth, free bloom.

EUTIN (P). Carmine red, AS 3.5-5cm.(1940). Double, bud pointed globular, cupped, cluster to 100 on long strong stem, Fol. leathery, glossy, dark, Vig., medium growth.

GORDON DRAKE (P). Cerise pink, AS 3.5-5cm.(1956). Double, Eutin sport, large cluster, Vig., medium growth.

INFANTANIA (P). White, AS 3.5-5cm.(1953). Double, bud globular, fragrant large cluster, medium growth.

LEONIE LAMESCH (P). Light coppery-red, yellow centre, edge darker, AS 5-6.5cm. (1899). Semi-double, bud ovoid, Fol. rich green, soft Vig., bushy.

MARY (P). Orange-cerise, AS 3.5-5cm.(1947). Double, bud pointed, globular, cupped, large cluster, Fol. glossy, compact bushy, free bloom.

MERVELLE DES ROUGES (P). Crimson wine shade, AS 3.5-5cm(1911). Double, bud globular, cupped, Fol. compact large cluster, free bloom, medium growth.

PINK ROSETTE (P). Soft pink, AS 3.5-5cm(1948). Double, bud globular, cupped, rosette form, cluster, Fol. leathery, dark, bushy, free bloom, medium growth.

WHITE CECILE BRUNNER A fine creamy white version of its well known namesake. First recorded in 1909.

FRIENDLY ENVIROMENTAL SPRAY

To help control blackspot and mildew

Will NOT help in the control of insects.

Spray ONLY in the cool of the day

Spray every ten to fourteen days.

1 PART (1 CUP) OF ANY VEGETABLE COOKING OIL

½ PART (1/2 CUP) WATER

Place into blender with a teaspoon of washing up detergent (this is not essential but it makes the mixture able to be stored for a length of time). Blend for a few seconds to create a mayonnaise type mix. Place into jar.

Mixing : Mix 1 part (10 mls.) home-made spray to 40 parts (400 mls) water and spray all parts of plant, especially under the leaf. (i.e. 25mls per litre of water.)

MILK SPRAY RECIPE

One part full cream milk to 10 parts water. Spray young growth as it appears at least every 10 days to protect against Black Spot.

To control insects, spray with NEEM OIL. Follow directions on pack.

Ten Tips to Successful Rose Growing

1. **TIME** - Spend time caring for your Roses. Growing roses is a time consuming passion, that will reward you with lots of wonderful flowers. You should allow at least 1 to 2 hours per week for an average sized garden of 10-15 plants to carry out all the required maintenance tasks.

2. SOIL - Roses prefer a well drained soil, preferably sandy loam with a PH of 6.5. Most poorer soils can be improved to accommodate roses. NB - Always check soil PH level at least 4 weeks prior to planting and then once or twice per year there after to maintain correct PH level. **Never** plant new roses in freshly composted or manured beds. This should be done 8-10 weeks before planting.

3. LIGHT - Roses require at least 5-6 hours of full sunlight per day. Plant a minimum of 3m - 4m away from large trees and palms to avoid root invasion and shading from sunlight by tall trees. Afternoon shade is OK and in most cases beneficial on hot summer afternoons. Where possible, position rose gardens on the north - eastern side of your house for the best results.

4. SPACE - Do not over crowd rose gardens with annuals, other plants or shrubs. Roses grow best when planted in a bed of their own. Plant roses at least 90cm. apart and follow planting guides when planting new roses.

5. MULCH - Keep surface of rose bed well mulched, with either Lucerne hay, straw, grass clippings, old dry natural cow manure or woodchips, BUT NOT pine bark. Mulching keeps weeds away and in summer, retains moisture and prevents heat burn from loose soil.

6. NUTRIENTS (Fertilizer) Roses will only grow as good as you feed them. Fertilize in Spring, Summer and Autumn with 60-70 grams / sq. m. of Nitrophoska Rose Food. Three weeks after each application, you should apply some organic fertilizer such as Dynamic Lifter or Organic Life, to maintain correct Ph. levels and to avoid soil burn out. Pamper your roses weekly in summer with liquid fertilizer such as Phostogen or Fish Emulsion. This promotes strong healthy growth of foliage and flowers and helps plants to resist attack from pests.

7. WATER - Deep water root systems by soaking soil with a sprinkler on well established plants for about 1½ - 2 hours every fortnight, or as required - depending on the weather conditions. In windy, dry conditions, you should be prepared to check the soil every couple of days to ensure that moisture is still present in the soil underneath the mulch. Water only if soil is starting to dry out.

8. SPRAYING - Regular spraying is essential for a healthy rose garden. Spray roses every two weeks to PREVENT Black Spot and other fungus diseases before they occur. Inspect the flowers and leaves weekly for signs of any pests, that would damage the Leaf system. Common and most damaging to roses are Aphids, Mites, Thrips, Scale, leaf eating beetles and caterpillars. Use only recommended rose sprays and chemicals on targeted Pests. Always follow directions on pack when using sprays and fertilizers

9. PRUNING Hard prune bush roses from mid July to early August to promote strong Spring growth. Light prune again in mid March to remove any dead or spindly twigs, (but leave on any new strong growth) for a vigorous Autumn flush.

10. HYGIENE Maintain your rose garden in a weed and pest free environment. Do not allow near-by plants and gardens to harbour pests. Regularly remove old dead flower heads and diseased leaves to promote fresh new growth. A healthy root and leaf system are essential to obtain, a beautiful flourishing Rose garden.

Rose Pests and Diseases

To keep your roses looking good, regular spraying of your plants to control pests and diseases is essential. Here is an easy to follow spray programme. This programme will control all grubs, beetles, aphids, black spot, mildew and scale insects.

Week 1. Spray with mancozeb, carbaryl and rogor. Or alternatively use Yates rose gun or substitute.

Week 2. Check for any pests and if any found, repeat week one, if none detected, no need to spray.

Week 3. Spray with Triforene. Or use Yates Rose Gun.

Week 4. Check for pests - grub, scales and aphids, etc. If any detected, spray with Malathon.

Week 5. Should be at the end of the month, return to week 1 and follow through programme again.

Always follow directions on pack for rates and pests controlled,

Note - Mancozeb can be substituted with Kocide or copper oxychloride.

If any further help is needed - contact our nursery.
